*For Hospital or
Home Use*

Made in USA

*Optional
Portable Alarm
(see other side)*

Free 30 Day Evaluation
Contact us for information

E-Z CALL was invented by a paralyzed engineer,
who founded Med Labs in 1969.

Typical Application

A person with very little strength or range of motion can easily summon help with a gentle push on any part of the Touch Panel. Two clips keep it from moving away.

A “Hook & Loop” strap allows E-Z CALL to be secured to bed rail for more capable users.

Features

- Ultra sensitive “Touch Panel” permits use by almost totally paralyzed individuals.
- Easy for user to locate and operate— No searching or prehension (grasp) required.
- Large Touch Panel—3.5x5 inches.
- Reliable—Waterproof and dust proof switch, rated at 1 million operations!
- Low false-alarm rate.
- Versatile—Securely attaches anywhere on bedding, bedrail, near user’s head, hand, foot, etc., for optimum accessibility. Once in place, it stays in place.
- 10 foot cord, with “1/4 inch Phone Plug” connector. It will plug into most hospital call systems, and into the optional PA-1 Portable Alarm.
- Rugged, high quality—Made in USA, 5 Year warranty on materials and workmanship!
- Also available—Special cords, connectors, and “Normally Closed” switch.
- Low Price
